

ABOUT THE INSTITUTION

MIRACLE EDUCATIONAL SOCIETY

GROUP OF INSTITUTIONS Established in the year 2003 approved by the All India Council for Technical Education (AICTE) and affiliated to Jawaharlal Institute of Technological University, Kalanadi, Lakshadweep Miracle City, Bhagapuram, Villanagaram district of Andhra Pradesh, MES provides an evening community class-of-the-art facilities, infrastructure and a computer facility. The Institute encourages collaborative learning between industry and academia as a means of reinforcing its curriculum with practical and real world experiences.

ABOUT THE DEPARTMENT

The MBA (Master of Business Administration) Programme

An MBA programme provides a graduate with a flexible degree which can help increase the awareness of general business knowledge and enhance understanding in any particular business domain. Typically an MBA helps the graduate to become more marketable across a wider range of work-profiles and across industries, move upwards in a company and managerial cadre, develop an extensive professional network consisting of peers and seniors.

Senior positions in business involve responsibilities that need good functional understanding of management of human resources and financial resources. These resources need to be utilised in a cost-effective manner with the best operational efficiency. An MBA helps develop a fundamental understanding of such knowledge across domains like human resources, finance, marketing, operations and information technology that is not normally received from any single focused undergraduate degree programme. Acquiring an MBA is a process filled with learning new skills, studying methodology and discussing ideas that provide employment opportunities.

IMPORTANCE OF Stock Mind

Stock mind is an annual nationwide virtual stock market competition for college students. Stockmind is real-world trading environment helps you sharpen your analytical decision making and quick thinking skills.

Stock MIND aims to provide students a platform to develop and sharpen skills that are highly valued in any industry. They might choose to make their careers in equity markets. Most importantly, the Stock Market Game will help you develop positive financial habits and prepare you for your future. And you can win attractive prizes at every level.

On

Data Mining
16th -20th June 2014

Organized by

Department of MCA

**MIRACLE EDUCATIONAL SOCIETY
GROUP OF INSTITUTIONS**

(Approved by AICTE & Affiliated to JNTU, Kakinada)
Miracle City, Bhogapuram,
Vizianagaram-535216 Andhra Pradesh

Website: www.edulokam.com

IMPORTANCE OF TRAINING

Data mining is the process of discovering patterns in large data sets involving methods at the intersection of machine learning, statistics, and database systems.

Data mining is a process used by companies to turn raw data into useful information. The online software to look for patterns in large batches of data. businesses can learn more about their customers to develop more effective marketing strategies, increase sales and decrease costs.

Definition of Data Mining: Definition: In simple words, data mining is defined as a process used to extract usable data from a larger set of raw data. It involves analyzing data patterns in large batches of data using data mining software. Data mining is also known as Knowledge Discovery in Data (KDD).

TOPICS TO BE COVERED IN THE TRAINING

- > Data mining, also called knowledge discovery in databases, is computer science, the process of discovering interesting and useful patterns and relationships in large volumes of data.
- > Data mining has a lot of advantages when used in a specific industry. Besides these advantages, data mining also has its own disadvantages e.g., privacy, security, and misuse of information.
- > Data visualization is the graphical representation of information and data. By using visual elements like charts, graphs, and maps, data visualization tools provide an accessible way to see and understand trends, outliers, and patterns in data.
- > Data mining is a very important process where potentially useful and previously unknown information is extracted from large volumes of data. ... The major components of any data mining system are data source, data warehouse server, data mining engine, pattern evaluation module, graphical user interface and knowledge base.

ABOUT THE DEPARTMENT

The **MECHANICAL ENGINEERING** Programme

Mechanical Engineering is the mother of all branches. The contribution of this branch is enormous in the growth of technology over the centuries. B.Tech courses varies from Material Research to Machinery Development. Those who wants to develop/acquire breadth and depth of knowledge and skills required to design fabricate and maintenance of things ranging from a safety pin to a space craft. Those who are interested to work with massive machines to tiny precision instruments/devices. Acquiring an Mechanical degree is a process filled with learning new skills, studying methodologies and discussing industries that provide employment opportunities.

Website: www.edulekam.com

IMPORTANCE OF WORKSHOP

Automobile engineering is a fascinating career path, demanding hands-on skills in design and manufacturing along with the knowledge of latest advancements. In this course, you will develop these skills by building a scaled-down prototype of a car on your own.

By making this automobile prototype which can be controlled with a Radio Control, you will learn about the dynamics, control and overall design of real vehicles. You will make your model car with working copies of automobile systems like transmission, suspension, powertrain, steering, locomotion and the chassis. This will help you develop a deeper understanding of automobile engineering and give you necessary practical skills useful for the automobile industry.

TOPICS COVERED IN THE TRAINING

- > Overview of Automobile prototyping
- > Here is how Automobile prototyping place
- > Why Automobile prototyping ?
- > Automobile prototyping tools.
- > Automobile prototyping Live projects.
- > Importance of Automobile prototyping
- > Automobile prototyping
- > Strategy of digital marketing
- > Search engine optimization of Automobile prototyping

ON
Design of Solar Power Plant
&
Its Applications**

14th to 21st JULY 2014

Importance of Design of Solar Power Plant

Solar energy is defined as the sun's radiation that reaches the earth. It is the most readily available source of energy. The sun is the earth's power station and the source of all energy on our planet. Solar energy is the energy force that sustains life on Earth for all plants, animals and people. It provides a compelling solution for all societies to meet their needs for clean, abundant sources of energy in the future. India is densely populated and has high solar insulation, an ideal combination for using solar power in India. Solar energy is widely used in India. This workshop presents the solar energy current production in India from different states and needs of solar energy for rural area development in India. The solar energy could supply all the present and future energy needs of the world. The most explored renewable energy technologies for power generation in India, namely, Solar pond, and Solar Photovoltaic systems, need more sophistication for long-term benefits.

Topics to be covered:

- Fundamentals of Solar Energy
- Fundamentals of Solar radiation.
- Practical experience on solar resource measurement and analysis.
- Design philosophy and system designing.
- About PV modules, inverters, Batteries and other technologies.
- Hands on application of programming using MATLAB / Simulink.

The Institute encourages collaborative learning between industry and academia as a means of reinforcing its curriculum with practical and real world experiences.

ABOUT THE CSE DEPARTMENT

One of the most sought after courses amongst engineering students, Computer Science Engineering (CSE) is an academic programme which integrates the field of computer Engineering and Computer Science. The programme, which lays emphasis on the basics of computer programming and networking, comprises a plethora of topics. The said topics are related to computation, algorithms, programming languages, program design, computer software, computer hardware etc. Computer science engineers are involved in many aspects of computing, from the design of individual microprocessors, personal computers and supercomputers to circuit designing and writing software that powers them.

The course is offered by technical institutes across India and Abroad at the UG (Undergraduate) and PG (Postgraduate) level where students are awarded B.Tech and M.Tech degrees respectively. Students pursuing the course will be taught about design, implementation and management of information system of computer hardware and software. Even though CSE is one the engineering specializations, candidates pursuing the programme have the option of further choosing amongst various other specializations like Telecommunication, web designing, computer hardware & software implementation & maintenance etc.

INTRODUCTION TO ANDROID

Modern companies are seeking to expand their business over the digital world and more and more companies invest in the development of websites, personal software, and mobile applications. Mobile devices today are so advanced that we carry much carry mini-computers in our pockets. Escalating use of smart phones and tablets in recent years has made businesses increasingly invest in mobile applications, significantly boosting revenue and causing substantial business growth. The most popular and widely used platforms for creating mobile applications are Android and iOS. Google Marketplace and the App Store are the most visited digital markets. Companies around the world already have their apps that make it easier for customers and employees to work, and they also often bring significant revenue to their owners.

TOPICS TO BE COVERED IN THE WORKSHOP

- What's Android
- OHA and Android
- Features of Android
- Android Architecture
- Android Software Development
- Android Framework
- Development Environment
- Setup Android SDK

on
Digital Signal Processing
using MATLAB

17th to 22nd Sep 2014

Importance of Digital Signal Processing using MATLAB

MATLAB and signal processing products help you analyze signals from a range of data sources. You can acquire, measure, transform, filter, and visualize signals without being an expert in signal processing theory. You can apply signal processing tools to preprocess and filter signals prior to analysis.

Topics to be covered:

- Fundamentals of MATLAB.
- Fundamentals of Signal Processing using MATLAB.
- Different tool boxes of MATLAB.
- Processing of Real Time Sound.
- Frequency Analysis.
- Design and Implementation of Filters.

ABOUT THE INSTITUTION

MIRACLE EDUCATIONAL SOCIETY GROUP OF INSTITUTIONS

Established in the year 2009 approved by the All India Council for Technical Education (AICTE) and affiliated to Jawaharlal Nehru Technological University, Kakinada. Located in Miracle City, Bhogapuram, Vizianagaram district of Andhra Pradesh, MES provides its learning community state-of-the-art facilities, infrastructure and a competent faculty. The Institute encourages collaborative learning between industry and academia as a means of reinforcing its curriculum with practical and real world experiences.

ABOUT THE DEPARTMENT

The MCA (Master of Computer Applications) Programme

"MCA (Master of Computer Applications) is a professional master's degree in computer science. It focuses on providing a theoretical as well as practical training to students in the related field." Computer Applications is a use of computer to solve a problem or to accomplish a particular job.

Master of Computer Applications (MCA) is a three-year (six semesters) professional Master's Degree in computer science awarded in India. The course was designed to meet the growing demand for qualified professionals in the field of Information Technology.

So, it is a better choice to grow your career in IT sector and MCA course is the best option to make your career in IT sector because MCA is not only a post graduate program but it is also a complete professional making course for students to grow a successful career in IT sector.

PRODUCT OF WORKING

Apache Hadoop is a collection of open-source software utilities that facilitate using a network of many computers to solve problems involving massive amounts of data and computation. It provides a software framework for distributed storage and processing of big data using the MapReduce programming model.

Hadoop is an Apache project that provides a framework written in Java that allows distributed processing of large datasets across clusters of commodity hardware using commodity hardware.

Hadoop is designed to scale on from single server to thousands of machines, each offering local computation and storage.

Hadoop integration: Hadoop architecture is designed to be easily integrated with other systems. Systems that are usually integrated with Hadoop are: * integration tools such as, MapReduce, Flume, and others.

WORKING OF HADOOP

- > A MapReduce job usually splits the input data-set into independent chunks which are processed by the map tasks in a completely parallel manner. The framework sorts the outputs of the maps, which are then input to the reduce tasks. Typically both the input and the output of the job are stored in a file system.
- > On a Hadoop cluster, the data within HDFS and the MapReduce system are located on every machine in the cluster. A single NameNode tracks where data is located in the cluster of servers, known as DataNodes. Data is stored in data blocks on the DataNodes.
- > A node in Hadoop simply means a computer that can be used for processing and storing. There are two types of nodes in Hadoop: NameNode and DataNode. It is called as a node as all these computers are interconnected. NameNode is also known as the Master node.
- > NameNode does not store the actual data or the dataset. The data itself is actually stored in the DataNodes.

WORKING PERSONS

A Seven days workshop
on
A Workshop on Embedded
&
Simulation tools

27th & 28th DECEMBER 2014

Importance of MATLAB & Simulation

Simulink is a simulation and model-based design environment for dynamic and embedded systems, integrated with MATLAB. Simulink, also developed by MathWorks, is a data flow graphical programming language tool for modeling, simulating and analyzing multi-domain dynamic systems. It is basically a graphical block diagramming tool with customizable set of block libraries.

It allows you to incorporate MATLAB algorithms into models as well as export the simulation results into MATLAB for further analysis.

Simulink supports –

- System-level design
- Simulation
- Automatic code generation
- Testing and verification of embedded systems

Topics to be covered:

- Fundamentals of MATLAB.
- Introduction to Simulink.
- Practical experience on Math Tool
- Design philosophy and system designing.
- Hands on application of programming using MATLAB / Simulink.
- Applications, advantages and disadvantages.

ABOUT THE DEPARTMENT

The MECHANICAL ENGINEERING Programme

Mechanical Engineering is the mother of all branches. The contribution of this branch is enormous in the growth of technology over the centuries. B.Tech courses varies from Material Research to Machinery Development. Those who want to develop/acquire breadth and depth of knowledge and skills required to design fabricate and maintenance of things ranging from a safety pin to a space craft. Those who are interested to work with massive machines to tiny precision instruments/devices. Acquiring an Mechanical degree is a process filled with learning new skills, studying methodologies and discovering industries that provide employment opportunities.

IMPORTANCE OF WORKSHOP

Advanced manufacturing is about innovating products and processes in the manufacturing cycle to operate more product only. Some research talks about utilizing technology to gain these innovations, others attribute the changes to the role of the customer in the manufacturing process.

Advanced manufacturing integrates technological processes into manufacturing to assist companies in their efforts to produce products more efficiently. One of the fundamental goals of manufacturing is to produce products in the least amount of time while also minimizing the amount of waste.

TOPICS TO BE COVERED IN THE TRAINING

- Overview of Advanced manufacturing
- Here is how Advanced manufacturing plans
- Why Advanced manufacturing?
- Advanced manufacturing tools
- Advanced manufacturing Live projects
- Importance of Advanced manufacturing
- Advanced manufacturing
- Strategy and optimization of Advanced manufacturing

ABOUT THE DEPARTMENT

The MBA (Master of Business Administration) Programme

An MBA programme provides a graduate with a flexible degree which can help advance the careers of general business knowledge and enhance understanding in any particular business domain. Typically an MBA helps the graduate to become more marketable across a wider range of work profiles and across industries, move upwards in a company, improve managerial skills, develop an extensive professional network or even set up their own business.

Senior positions in business involve responsibilities that need good functional understanding of management of human resources and financial resources. These resources need to be utilized in a competitive market with the best operational efficiency. An MBA helps develop a fundamental understanding of such knowledge across domains like human resources, finance, marketing, operations and information technology that is not normally covered from any single focused undergraduate degree programme. Acquiring an MBA is a process filled with learning new skills, studying methodologies and discussing industries that provide employment opportunities.

Workshop

on

Google App Engine
02nd -07th Jan 2015

Organized by

Department of MCA

MIRACLE EDUCATIONAL SOCIETY
GROUP OF INSTITUTIONS

(Approved by AICTE & affiliated to JNTU, Kakinada)
Miracle City, Bhogapuram,
Vizianagaram-535214 Andhra Pradesh

Website: www.edelokam.com

IMPORTANCE OF TRAINING

Google App Engine is a Platform as a Service and cloud computing platform for developing and hosting web applications in Google-managed data centers. Applications are sandboxed and run across multiple servers.

Google search engine is free (or close to free) to use, as well as many other products they offer. Google makes money with various other things: AdSense and the advertising advertisements on Google.

The App Engine app is now on iOS. The brand-new Google Nexus app introduced at last week's consumer keynote of Google I/O has arrived on iPhones in the UK. The app, which reduces the Google Play Newsstand app on iOS and Android, is continuing to roll out to users across 177 different countries.

The service is free in a certain level of consumed resources and only in standard environment but not in flexible environment.

TOPICS TO BE COVERED IN THE TRAINING

- > App Engine is designed in such a way that it can sustain multiple datacenter outages without any downtime. This resilience to downtime is shown by the statistic that the High Replication Database saw 0% downtime over a period of a year.
- > Google App Engine supports many Java standards and frameworks. Core to this is the servlet 2.5 technology using the open-source Jetty Web Server, along with accompanying technologies such as JSP. JavaServer Faces operates with some workarounds. A newer release of App Engine Standard Java in Beta supports Javaf, Servlet 3.1 and Jetty9.
- > App Engine can only execute code called from an HTTP request.
- > Google App Engine primarily supports Go, PHP, Java, Python, Node.js, N ET, and Ruby applications, although it can also support other languages via "custom runtimes".
- > Hosted web applications in Google-managed data centers.

The Institute encourages collaborative learning between industry and academia as a means of reinforcing its curriculum with practical and real world experiences.

ABOUT THE COURSE

One of the most sought after courses amongst engineering students, Computer Science Engineering (CSE) is an academic programme which integrates the field of computer Engineering and Computer Science. The programme, which lays emphasis on the basics of computer programming and networking, comprises a plethora of topics. The said topics are related to computation, algorithms, programming languages, program design, computer software, computer hardware etc. Computer science engineers are involved in many aspects of computing, from the design of individual microprocessors, personal computers and supercomputers to circuit designing and writing software that powers them.

The course is offered by technical institutes across India and abroad at the UG (Undergraduate) and PG (Postgraduate) level where students are awarded B.Tech and M.Tech degree respectively. Students pursuing the course will be taught about design, implementation and management of information system of computer hardware and software. Even though CSE is one the engineering specialisations, candidates pursuing the programme have the option of further choosing amongst various other specializations like Telecommunication, web designing, computer hardware & software implementation & maintenance etc.

Mobile computing is a generic term that refers to a variety of devices that allow people to access data and information from wherever they are. Mobile computing transports data, voice, and video over a network via a mobile device.

Mobile devices can be connected to a local area network (LAN), or they can take advantage of Wi-Fi or wireless technology by connecting via a wireless local area network (WLAN). Mobile phone services also provide mobile computing through their service plans.

- > Fundamentals of mobile computing
- > Fundamentals of wireless networking

ABOUT THE INSTITUTION

MIRACLE EDUCATIONAL SOCIETY

GROUP OF INSTITUTIONS Established in the year 2009 approved by the All India Council for Technical Education (AICTE) and affiliated to Jawaharlal Nehru Technological University, Kakinada. Located in Miracle City, Bhogapuram, Vizianagaram district of Andhra Pradesh, MES provides its learning community state-of-the-art facilities, infrastructure and a competent faculty. The Institute encourages collaborative learning between industry and academia as a means of reinforcing its curriculum with practical and real world experiences

ABOUT THE DEPARTMENT

The Department of Electronics & Communication Engineering has well qualified faculty with specializations which include Radar & Microwave Engineering, VLSI, Embedded systems, Systems and Signal Processing, Digital Electronics and Communication systems etc. The department is continuously updating its facilities to make the students excel in all respects in the area of electrical engineering. The laboratories are well equipped as per the curriculum and also to carry out student project work. The department has taken various initiatives to reduce the gap between academics and industry

IMPORTANCE OF WORKSHOP

The Internet of Things (IoT) is a system of interrelated computing devices, mechanical and digital machines, objects, animals or people that are provided with unique identifiers (UIDs) and the ability to transfer data over a network without requiring human-to-human or human-to-computer interaction.

TOPICS TO BE COVERED IN THE TRAINING

- > Overview of IoT.
- > Basics of IoT using Arduino,
- > Programming concepts using Raspberry pi
- > Arduino Board Layout and Architecture, Programming fundamentals.
- > Interfacing of Sensors
- > Versions of Raspberry Pi and their difference.

RESOURCE PERSONS

Dr. B. Rajesh Kumar Prof of ECE, GITAM University Visakhapatnam.

ELIGIBILITY

workshop is aimed at honing the teaching and research skills of perspective, new and seasoned, researches and trainers.

IMPORTANT DATES

Participants should confirm their interest on or before 21st September 2015
Training Dates: 24-09-2015 to 29-09-2015

REGISTRATION FEES

Participant Fee: Rs.350

A Six Day Workshop
on
Antenna Design and its
Applications

28th March to 2nd April 2015

Importance of Antenna Design

A person, who needs to convey a thought, an idea or information, can do so by voice communication. The individuals communicating between two people with each other can take place through sound waves. However, if two people want to communicate who are at wide distance, then we have to convert these sound waves into electromagnetic waves. The device, which converts the required information signal into electromagnetic waves, is known as an Antenna.

The antenna is one of the major components in any wireless communication system. The word 'antenna' is derived from Latin word 'antenna.' Since the first demonstration of wireless technology by Heinrich Hertz and its first application in practical radio communication by Guglielmo Marconi, the antenna has basic building block in the construction of every wireless communication system.

Topics to be covered:

- Basics of Antenna Design .
- Array Antennas,
- Deployable Antennas,
- Surface Integrated Antennas,
- Ground Terminal Antennas,
- Instrument Antennas, Dielectric lens Antennas, Nano Antennas,
- Multi beam Antennas, Steerable Antennas, Various applications of Antennas.

ABOUT THE INSTITUTION

MIRACLE EDUCATIONAL SOCIETY

GROUP OF INSTITUTIONS: Established in the year 2009 approved by the All India Council for Technical Education (AICTE) and affiliated to Jawahar Education Technological University, Kakinda Located at Miracle City, Bhogapuram, Visuvanagaram district of Andhra Pradesh, MES provides an learning community state-of-the-art facilities, infrastructure and a competent faculty. The Institute encourages collaborative learning between industry and academic as a means of reinforcing its curriculum with practical and real world experiences.

ABOUT THE DEPARTMENT

The MECHANICAL ENGINEERING Programme

Mechanical Engineering is the mother of all branches. The contribution of this branch is enormous in the growth of technology over the centuries. B.Tech courses varies from Material Research to Machinery Development. Those who wants to develop/acquire breadth and depth of knowledge and skills required to design fabricate and maintenance of things ranging from a safety pin to a space craft. Those who are interested to work with massive machines to tiny precision instruments/devices. Acquiring an Mechanical degree is a process filled with learning new skills, studying methodologies and discussing industries that provide employment opportunities.

GROUP OF INSTITUTIONS

Approved by AICTE & Affiliated to JNTU, Kakinda
Miracle City, Bhogapuram,
Visuvanagaram-535216 Andhra Pradesh

Website: www.edgokam.com

IMPORTANCE OF WORKSHOP

Lean manufacturing or lean production is a systematic method originating in the Japanese manufacturing industry for the minimization of waste within a manufacturing system without sacrificing productivity, which can cause problems. Lean also takes into account waste created through overburden and unevenness in work loads. Working from the perspective of the client who consumes a product or service, "value" is any action or process that a customer would be willing to pay for.

TOPICS TO BE COVERED IN THE TRAINING

- > Overview of Lean manufacturing.
- > Here is how Lean manufacturing takes place
- > Why Lean manufacturing?
- > Lean manufacturing tools
- > Lean manufacturing Live projects
- > Importance of Lean manufacturing
- > Lean manufacturing
- > Strategy of Lean manufacturing
- > optimization of Lean manufacturing

RESOURCE PERSONS

A Ten days workshop
On
Failures in Structure

22nd to 31st JULY 2016

About Failures in Structure

Structural integrity is the ability of an item either a structural component or a structure consisting of many components to hold together under a load, including its own weight, without breaking or deforming excessively. It assures that the construction will perform its designed function during reasonable use, for as long as its intended life span. Items are constructed with structural integrity to prevent catastrophic failure, which can result in injuries, severe damage, death, and/or monetary losses.

Topics to be covered:

- Introduction
- History
- Types of failure
- Notable failures
- Failures in Bridges, Dee bridge, First Tay Rail Bridge, First Tacoma Narrows Bridge, W Bridge
- Failures in Buildings, Thane building collapse, Sevar building collapse, Sampoong Department Store collapse, Ronan Point
- Failures in Aircraft

The Institute encourages collaborative learning between industry and academia as a means of reinforcing its curriculum with practical and real world experiences.

One of the most sought after courses amongst engineering students, Computer Science Engineering (CSE) is an academic programme which integrates the field of computer Engineering and Computer Science. The programme, which lays emphasis on the basis of computer programming and networking, encompasses a plethora of topics. The said topics are related to computation, algorithms, programming languages, program design, computer software, computer hardware etc. Computer science engineers are involved in many aspects of computing, from the design of individual microprocessors, personal computers and supercomputers to circuit designing and writing software that powers them.

The course is offered by technical institutes across India and Abroad at the UG (Undergraduate) and PG (Postgraduate) level where students are awarded BTech and MTech degree respectively. Students pursuing the course will be taught about design, implementation and management of information system of computer hardware and software. Even though CSE is one the engineering specializations, candidates pursuing the programme have the option of further choosing amongst various other specializations like Telecommunication, web designing, computer hardware & software implementation & maintenance etc.

A Seven days workshop
on
**Power Conservation
for Smart Grids**

Importance of Power Conservation for Smart Grids

A smart grid is an electricity network allowing devices to communicate between suppliers and consumers, allowing them to manage demand, protect the distribution network, saves energy and reduces costs. This gives the study on the application of SG(Smart grids) in EC(Energy Conservation), laying information about new technologies and different ways of applying them to promote the EC.

Smart grid will become the next-generation electrical power system to provide reliable, efficient, secure, and cost effective energy generation, distribution, and consumption.

Topics to be covered:

- Introduction to Smart Grid and its technology.
- Advances in smart grid power system.
- Network and Security.
- Design philosophy and system designing.
- Compare and contrast.
- Hands on application of programming using MATLAB/Simulink.
- Conclusions.
- Applications, advantages and disadvantages.

ABOUT THE INSTITUTION

MIRACLE EDUCATIONAL SOCIETY

GROUP OF INSTITUTIONS Established in the year 2009 approved by the All India Council for Technical Education (AICTE) and affiliated to Jawaharal Nehru Technological University, Kakinada. Located in Miracle City, Bhogapuram, Vizianagaram district of Andhra Pradesh, MES provides its learning community state-of-the-art facilities, infrastructure and a competent faculty. The Institute encourages collaborative learning between industry and academia as a means of reinforcing its curriculum with practical and real world experiences.

ABOUT THE DEPARTMENT

The MBA (Master of Business Administration) Programme

An MBA programme provides a graduate with a flexible degree which can help increase the awareness of general business knowledge and enhance understanding in any particular business domain. Typically an MBA helps the graduate to become more marketable across a wider range of work-profiles and across countries, move upwards in a company into managerial cadre, develop an extensive professional network or even set up one's own business.

Senior positions in business involve responsibilities that need good functional understanding of management of human resources and financial resources. These resources need to be utilized in a competitive market with the best operational efficiency. An MBA helps develop a fundamental understanding of such knowledge across domains like human resources, finance, marketing, operations and information technology that is not normally reserved from any single focused undergraduate degree programme. Acquiring an MBA is a process filled with learning new skills, studying methodologies and discussing industries that provide employment opportunities.

on

Phishing

24th - 28th Sep 2015

Organized by

Department of MCA

**MIRACLE EDUCATIONAL SOCIETY
GROUP OF INSTITUTIONS**

(Approved by AICTE & Affiliated to JNTU, Kakinada)
Miracle City, Bhogapuram,
Vizianagaram-535216 Andhra Pradesh

Website: www.edulokam.com

IMPORTANCE OF TRAINING

Phishing is a type of social engineering attack often used to steal user data, including login credentials and credit card numbers. It occurs when an attacker masquerades as a trusted entity, lures a victim into opening an email, instant message, or text message.

Phishing is the fraudulent attempt to obtain sensitive information such as usernames, passwords and credit card details by disguising oneself as a trustworthy entity in an electronic communication.

Phishing is a cybercrime in which a target or targets are contacted by email, telephone or text message by someone posing as a legitimate institution to lure individuals into providing sensitive data such as personally identifiable information, banking and credit card details, and passwords.

DEFINITION

DEFINITION OF PHISHING IN THE VAMANA

- **Phishing** is really just one type of a broader category of crime known as identity theft. Identity theft covers any instance where someone attempts to use someone else's personal information in a fraudulent or illegal manner, though phishing scams are very common.
- **Phishing** occurs when someone on the Web pretends to be someone they're not to trick you into providing confidential information. For example, if you receive an email that looks like it came from your bank, it may be from criminals seeking to lure you into giving them your account data.
- **Phishing** is a common method of online identity theft and virus spreading. ... In addition to stealing personal and financial data, phishing can infect computers with viruses and convince people to participate unwittingly in money laundering.
- Select the spam email, right-click, choose **Junk** from the drop menu, and click **Block Sender**. Outlook marks it and relocates it immediately.

ABOUT THE DEPARTMENT

The MECHANICAL ENGINEERING Programme

Mechanical Engineering is the mother of all branches. The contribution of this branch is enormous in the growth of technology over the centuries. B.Tech courses range from Material Research to Machinery Development. Those who want to develop acquire breadth and depth of knowledge and skills required to design, fabricate and maintain of things ranging from a safety pin to a space craft. Those who are interested to work with massive machines to tiny precision instruments/devices. Acquiring an Mechanical degree is a process filled with learning new skills, studying methodologies and discussing industries that provide employment opportunities.

CNC WORKSHOP (CNC WORKSHOP)

Numerical control (also computer numerical control, and commonly called CNC) is the automated control of manufacturing tools (drills, boring tools, lathes) and 3D printers by means of a computer. A CNC machine processes a piece of material (metal, plastic, wood, ceramic, or composite) to meet specifications by following a coded programmed instruction and without a manual operator.

CNC machine is a motorized maneuverable tool and often a motorized maneuverable platform, which are both controlled by a computer, according to specific input instructions. Instructions are delivered to a CNC machine in the form of a sequential program of machine control instructions such as G-code and then executed.

TOPICS TO BE COVERED IN THE TRAINING

- Overview of CNC Manufacturing
- Here is how CNC Manufacturing place
- Why CNC Manufacturing?
- CNC Manufacturing tools
- CNC Manufacturing Live projects
- Importance of CNC Manufacturing
- CNC Manufacturing
- Strategy of CNC Manufacturing
- Search and optimization of CNC Manufacturing

A Seven days workshop
on
**Industrial Automation -
PLC & SCADA**

05th to 09th February 2016

Importance of Industrial Automation - PLC & SCADA:

The main objective of this Workshop is to make the aspiring engineers acquainted with the conceptual as well as practical knowledge of the Industrial Automation & latest technologies being used to achieve industrial automation. The idea of organizing this workshop is to inculcate the basic fundamentals of automation in the students and provide them with a platform to work on, in The Near Future.

The Most-Used Guiding Force Behind An Automated Industrial Plant Is A "Programmable Logic Controller" Generally Known As A PLC. PLCs Along With Certain Other Necessary Ingredients Like Sensors, Motors, Actuators, Valves, Conveyors, Boilers, SCADA Systems, Computers & Many More, Makes A Real Automated Manufacturing Plant.

Topics to be covered:

- Introduction to Automation, PLC & SCADA.
- Evolution in Industrial automation.
- Different types of Industrial Control Mechanisms.
- Design philosophy and system designing.
- HMI introduction and it's need.
- Hands on application of programming using MATLAB/Simulink.
- Applications, advantages and disadvantages.

ABOUT THE INSTITUTION

MIRACLE EDUCATIONAL SOCIETY

GROUP OF INSTITUTIONS Established in the year 2009 approved by the All India Council for Technical Education (AICTE) and affiliated to Jawaharal Nehru Technological University, Kakinada. Located in Miracle City, Bhogapuram, Vizianagaram district of Andhra Pradesh, MES provides its learning community state-of-the-art facilities, infrastructure and a competent faculty. The Institute encourages collaborative learning between industry and academia as a means of reinforcing its curriculum with practical and real world experiences.

ABOUT THE COURSE DEPARTMENT

One of the most sought after courses amongst engineering students, Computer Science Engineering (CSE) is an academic programme which integrates the field of computer Engineering and Computer Science. The programme, which lays emphasis on the basics of computer programming and networking, comprises a plethora of topics. The said topics are related to computation, algorithms, programming languages, program design, computer software, computer hardware etc. Computer science engineers are involved in many aspects of computing, from the design of individual microprocessors, personal computers and supercomputers to circuit designing and writing software that powers them.

The course is offered by technical institutes across India and Abroad at the UG (Undergraduate) and PG (Postgraduate) level where students are awarded B.Tech and M.Tech degree respectively. Students pursuing the course will be taught about design, implementation and management of information system of computer hardware and software. Even though CSE is one the engineering specializations, candidates pursuing the programme have the option of further choosing amongst various other specializations like Telecommunications, web designing, computer hardware & software implementation & maintenance etc.

|--|
| <p>Big data is a field that treats ways to analyze, systematically extract information from, or otherwise deal with data sets that are too large or complex to be dealt with by traditional data processing application software. Data with many cases (rows) offer greater statistical power, while data with higher complexity (more attributes or columns) may lead to a higher false discovery rate. Big data was originally associated with three key concepts: volume, variety, and velocity. When we handle big data, we may not sample but simply observe and track what happens. Therefore, big data often includes data with sizes that exceed the capacity of traditional software to process within an acceptable time and value.</p> |

A Seven Days workshop
on
Non Renewable Energy Sources
&
Design Of Solar Power

27th to 31st JULY 2023

Importance of Non Renewable Energy sources and Design of Solar Power:

Non Renewable energy sources is one that cannot be produced or regenerated fast enough to keep up with the consumption of it. Solar energy is the energy force that sustains life on Earth for all plants, animals and people. It provides a compelling solution for all societies to meet their needs for clean, abundant sources of energy in the future. India is densely populated and has high solar insulation, an ideal combination for using solar power in India. Solar energy is widely used in India. The solar energy could supply all the present and future energy needs of the world. The most explored renewable energy technologies for power generation in India, namely: Solar pond, and Solar Photovoltaic systems need more sophistication for long-term benefits.

Topics to be covered:

- Fundamentals of Non Renewable Energy Sources.
- Energy flow in Ecosystem.
- Practical experience on solar resource measurement and analysis.
- Design philosophy and system designing.
- About PV modules, inverters, Batteries and other technologies.
- Hands on application of programming using MATLAB/Simulink.
- Applications, advantages and disadvantages.

ABOUT THE DEPARTMENT

The MCA (Master of Computer Applications) Programme

"MCA (Master of Computer Applications) is a professional master's degree in computer science. It focuses on providing a theoretical as well as practical training to students in the related field." Computer Applications is a use of computer to solve a problem or to accomplish a particular job.

Master of Computer Applications (MCA) is a three-year (six semesters) professional Master's Degree in computer science awarded in India. The course was designed to meet the growing demand for qualified professionals in the field of Information Technology.

So, it is a better choice to grow your career in IT sector and MCA course is the best option to make your career in IT sector because MCA is not only a post graduate program but it is also a complete professional making course for students to grow a successful career in IT sector.

Database and Blockchain
Technology
25th -30th July 2016

Organized by

Department of MCA

MIRACLE EDUCATIONAL SOCIETY
GROUP OF INSTITUTIONS

(Approved by A.I.C.T.E & Affiliated to JNTU, Kakinada)
Miracle City, Bhogapuram,
Vizianagaram-535216 Andhra Pradesh

Website: www.edulokam.com

The importance of Blockchain are a fascinating new technology. They enable fully decentralized databases resistant to censorship and potentially allowing for system adoption in critical applications like money and identity.

The important of Database Technology. Uses for database systems include: They store data and provide facilities of searching specific record in given data. They store special information used to manage the data.

The future of Bitcoin is the name of the best-known cryptocurrency; the one for which Blockchain technology was invented. A cryptocurrency is a medium of exchange, such as the US dollar but is digital and uses encryption techniques to control the emission of monetary units and to verify the transfer of funds.

- Every single time you make a transaction on the blockchain, that transaction is sent out to many nodes in the Bitcoin network. — The blockchain is a shared public ledger on which the entire Bitcoin network relies. All confirmed transactions are included in the block chain.
- There are several possible ways to convert bitcoin to cash and ultimately move it to a bank account. Sell bitcoin on a cryptocurrency exchange, such as Coinbase or Kraken. This is the easiest method if you want to sell bitcoin and withdraw the resulting cash directly to a bank account. Use a bitcoin ATM.
- Some DBMS examples include MySQL, PostgreSQL, Microsoft Access, SQL Server, FileMaker, Oracle, RDBMS, dBASE, Clipper, and FoxPro. Since there are so many database management systems available, it is important for there to be a way for them to communicate with each other.

The Institute encourages collaborative learning between industry and academia as a means of reinforcing its curriculum with practical and real world experience.

ABOUT THE DEPARTMENT

The MECHANICAL ENGINEERING Programme

Mechanical Engineering is the mother of all branches. The contribution of this branch is enormous in the growth of technology over the centuries. B.Tech courses varies from Material Research to Machinery Development. Those who wants to develop acquire breadth and depth of knowledge and skills required to design, fabricate and maintain things ranging from a safety pin to a space craft. Those who are interested to work with massive machines to tiny precision instruments/devices. Acquiring an Mechanical degree is a process filled with learning new skills, studying methodologies and discussing industries that provide employment opportunities.

CRYOGENICS

Organized by

Department of
MECHANICAL
ENGINEERING

MIRACLE EDUCATIONAL SOCIETY
GROUP OF INSTITUTIONS

(Approved by AICTE & Affiliated to JNTU, Kakinda)

Miracle City, Bhogapuram,

Virudunagar-535216 Andhra Pradesh

Website: www.edgoham.com

IMPORTANCE OF WORKSHOP

Cryogenics is defined as the scientific study of materials and their behavior at extremely low temperature. The word comes from the Greek *crus*, which means "cold", and *genesis*, which means "producing". The term is usually encountered in the context of physics, materials science, and medicine. A scientist who studies cryogenics is called a *cryogenicist*. A cryogenic material may be termed a *cryogen*. Although cold temperatures may be reported using any temperature scale the Kelvin and Rankin scales are most common because they do not have positive numbers.

TOPICS TO BE COVERED IN THE TRAINING

- Overview of cryogenics
- Here is how cryogenics takes place
- Why cryogenics?
- cryogenics tool
- cryogenics Live projects
- Importance of cryogenics
- cryogenics
- Strategy of cryogenics
- Search and optimization of cryogenics

A Ten days workshop
On
**Structural and Foundation
Analysis**

16th to 26th AUG 2016

About structural and foundation analysis

This workshop will address about the concepts of Structural engineering and Geo technical engineering. Participants will get familiar with knowledge of computational analysis methods, Geo technical characteristics of soil, variety of soil foundations necessary for different soil profiles, and all tools and techniques used for soil foundation engineering. Structural engineering deals with the analysis and design of structures. It helps engineers to understand the behavior of a structure when subjected to varied loads and design an efficient structure accordingly.

Foundations completely take up the load from the super structure. Foundation Analysis provides a unique perspective of understanding the nature of soil and structure-soil interaction as we basically rely upon the earth for our engineering applications.

Topics to be covered:

- Basics of Foundation Engineering
- Shallow Foundation
- Pile Foundation
- Caisson Foundation
- Machine Foundation
- Study of Suitable Foundation System for Structure
- Industrial approach to projects

ABOUT THE INSTITUTIONS

MIRACLE EDUCATIONAL SOCIETY GROUP OF INSTITUTIONS

Established in the year 2009 approved by the All India Council for Technical Education (AICTE) and affiliated to Jawaharlal Nehru Technological University, Kakinada. Located in Miracle City, Bhogapuram, Vizianagaram district of Andhra Pradesh, MES provides its learning community state-of-the-art facilities, infrastructure and a competent faculty. The Institute encourages collaborative learning between industry and academia as a means of rendering its curriculum with practical and real world experience.

OUR - THE PROGRAMME

One of the most sought after courses amongst engineering students, Computer Science Engineering (CSE) is an academic programme which integrates the field of computer Engineering and Computer Science. The programme, which lays emphasis on the basis of computer programming and networking, comprises a plethora of topics. The said topics are related to computation, algorithms, programming languages, program design, computer software, computer hardware etc. Computer science engineers are involved in many aspects of computing, from the design of individual microprocessors, personal computers and supercomputers to circuit designing and writing software that powers them.

The course is offered by technical institutes across India and Abroad at the UG (Undergraduate) and PG (Postgraduate) level where students are awarded B.Tech and M.Tech degree respectively. Students pursuing the course will be taught about design, implementation and management of information system of computer hardware and software. Even though CSE is one the engineering specializations, candidates pursuing the programme have the option of further choosing amongst various other specializations like Telecommunication, web designing, computer hardware & software implementation & maintenance etc.

IMPORTANCE OF THE WORKSHOP

The Internet of Things (IoT) is a system of interrelated computing devices, mechanical and digital machines, objects, animals or people that are provided with unique identifiers (UIDs) and the ability to transfer data over a network without requiring human-to-human or human-to-computer interaction.

The definition of the Internet of Things has evolved due to the convergence of multiple technologies, real-time analytics, machine learning, commodity sensors, and embedded systems.

TOPICS TO BE COVERED IN THE WORKSHOP

- What is Internet of Things?
- How IoT Works?
- Current Status & Future Prospect of IoT
- Knowledge Management – From Data to Wisdom
- The Future of IoT
- The Potential of IoT
- Few Applications of IoT
- Technological Challenges of IoT
- Criticisms & Controversies of IoT

RESOURCE PERSONNEL

Dr. D. Vijay Kumar , Professor,
Head of the Department IEEE,
AITAM Engineering College,
Tekkali, Srikalai.

ELIGIBILITY

IoT is regarded as the significant frontier that can improve almost all activities in our lives. Most of the devices, which have not previously been connected to the internet, can be networked and respond the same way as smart devices.

The limited no. of registration is 200

IMPORTANT DATES

Participants should confirm their interest on or before 23rd Aug 2016
Workshop Dates: 25th to 30th, Aug, 2016

REGISTRATION FEES

Faculty/Research Scholar: Rs.500
Participant from any college: Rs.:750

The MCA (Master of Computer Applications) Programme

"MCA (Master of Computer Applications) is a professional master's degree in computer science. It focuses on providing a theoretical as well as practical training to students in the related field." Computer Applications is a use of computer to solve a problem or to accomplish a particular job.

Master of Computer Applications (MCA) is a three-year (six semesters) professional Master's Degree in computer science awarded in India. The course was designed to meet the growing demand for qualified professionals in the field of Information Technology.

So, it is a better choice to grow your career in IT sector and MCA course is the best option to make your career in IT sector because MCA is not only a post graduate program but it is also a complete professional making course for students to grow a successful career in IT sector.

**Meanstack and MongoDB
Technology**
17th -22nd October 2016

Organized by

Department of MCA

**MIRACLE EDUCATIONAL SOCIETY
GROUP OF INSTITUTIONS**

(Approved by AICTE & Affiliated to JNTU, Kakinada)
Miracle City, Bhagapuram,
Vizianagaram-535216 Andhra Pradesh

Website: www.mesbhagapuram.com

IMPORTANCE OF TRAINING

The importance of Mean stack training is a collection of JavaScript technologies used to develop web applications. Therefore, from the client to the server to the database, everything is based on JavaScript. MEAN is a full-stack development toolkit used to develop a fast and robust web application.

The motivation of the MongoDB language is to implement a data store that requires high performance, high availability, and automatic scaling. MongoDB is extremely simple to install and implement. MongoDB uses JSON or BSON documents to store data.

MongoDB achieves replication by the use of replicasets. A replica set is a group of identical instances that host the same data set in a replica set mode. In ordinary mode, that requires all write operations.

TOPICS TO BE COVERED IN THE TRAINING

- > The MEAN stack is a full stack JavaScript solution that is enabling developers to build robust, fast and easy-to-maintain web apps.
- > MEAN Stack developer demand is quite low in India but there is high demand for Angular JS developers for front-end developer profile and Node JS developers for backend profile. There is also high demand for NoSQL database knowledge mostly like MongoDB. But as a MEAN Stack developer, the demand is low.
- > MongoDB is an open-source document NoSQL database with a problem. While very popular, cloud companies, such as Amazon Web Services (AWS), IBM Cloud, Salesforce, and OracleCloud has realized from it by offering it as a service while MongoDB Inc. hasn't been able to monetize it to the same degree.
- > "MongoDB" derives from the word "humongous" because of the database's ability to scale up with ease and hold very large amounts of data.

ABOUT THE INSTITUTION

MIRACLE EDUCATIONAL SOCIETY GROUP OF INSTITUTIONS

Established in the year 2007 approved by the All India Council for Technical Education (AICTE) and affiliated to Jawaharlal Nehru Technological University, Kakinada. Located in Miracle City, Bhogapuram, Visakhapatnam district of Andhra Pradesh, MES provides an exciting, community state-of-the-art facilities, infrastructure and a competent faculty. The Institute encourages collaborative learning between industry and academia as a means of reinforcing its curriculum with practical and real world experiences.

ABOUT THE DEPARTMENT

The MBA (Master of Business Administration) Programme

An MBA programme provides a graduate with a flexible degree which can help increase the awareness of general business knowledge and enhance understanding in any particular business domain. Typically an MBA helps the graduate to become more marketable across a wider range of work-profiles and across countries, move upwards in a company into managerial roles, develop an extensive professional network or even set up one's own business.

Senior positions in business involve responsibilities that need good functional understanding of managing men of human resources and financial resources. These resources need to be utilized in a competitive market with the best operational efficiencies. An MBA helps develop a fundamental understanding of such knowledge across domains like human resources, finance, marketing, operations and information technology that is not normally received from any single focused undergraduate degree programme. Acquiring an MBA is a process filled with learning new skills, studying methodologies and discovering industries that provide employment opportunities.

About the Institution

MIRACLE EDUCATIONAL SOCIETY'S GROUP OF INSTITUTIONS established in the year 1999 approved by the National Council for Technical Education (NCTE) and affiliated to Jawahar Education Technological University, Bangalore. Located at Mysore City, Bangalore-57, Karnataka district of South India. MITL provides an excellent educational state-of-the-art, campus, experienced and a competent faculty. The Institute encourages collaboration, learning between industry and academia as a means of understanding its curriculum with practical and well-gained experiences.

About the Department

The Department of Electrical & Electronics Engineering has well-qualified faculty with specializations which include power electronics, control engineering, embedded systems, power systems, computer applications in industrial drives etc. The department is continuously updating its facilities to make the students excel in all respects in the area of electrical engineering. The laboratories are well equipped as per the curriculum and also to carry out student project work. The department has taken various initiatives to reduce the gap between academics and industry.

A Seven days workshop
on

Home Automation system

13th to 19th February 2017

Importance of Home Automation System:
Home automation system makes the operations of various home appliances more convenient and saves energy. With the energy saving concept, home automation or building automation makes life very simple nowadays. It involves automatic controlling of all electrical or electronic devices in homes or even remotely through wireless communication. Centralized control of lighting equipments, air conditioning and heating, audio/video systems, security systems, kitchen appliances and all other equipments used in home systems is possible with this system.

Topics to be covered:

- Introduction to Home automation System.
- Types of Relays and Micro controllers.
- Benefits of Home automation system.
- Design philosophy and system designing.
- Bluetooth technology and other technologies.
- Hands on application of programming using MATLAB/Simulink.
- Applications, advantages and disadvantages.

A Six Day Workshop
on
Digital Circuit Implementation
using FPGA

21st to 26th February 2017

A Brief about FPGAs

A field-programmable gate array (FPGA) is an integrated circuit designed to be configured by a customer or a designer after manufacturing – hence the term “field-programmable”. The FPGA configuration is generally specified using a hardware description language (HDL), similar to that used for an application-specific integrated circuit (ASIC). Circuit diagrams were previously used to specify the configuration, but this is increasingly rare due to the advent of electronic design automation tools.

FPGAs contain an array of programmable logic blocks, and a hierarchy of “reconfigurable interconnects” that allow the blocks to be “wired together”, like many logic gates that can be interwired in different configurations. Logic blocks can be configured to perform complex combinational functions, or merely simple logic gates like AND and XOR. In most FPGAs, logic blocks also include memory elements, which may be simple flip-flops or more complete blocks of memory. Many FPGAs can be reprogrammed to implement different logic functions, allowing flexible reconfigurable computing as performed in computer software.

Topics to be covered:

- Introduction,
- Basics of Digital Circuit Implementation Using FPGA
- Basic Digital Electronics
- Implementation of digital blocks, Processor blocks.
- Memory device interfacing and file accessing

ABOUT THE INSTITUTION

MIRACLE EDUCATIONAL SOCIETY

GROUP OF INSTITUTIONS Established in the year 2009 approved by the All India Council for Technical Education (AICTE) and affiliated to Javahar Lal Nehru Technological University, Kalamada. Located in Miracle City, Bhogapuram, Vizianagaram district of Andhra Pradesh. MES provides an earning community (state-of-the-art facilities, infrastructure and a competent faculty. The Institute encourages collaborative learning between industry and academia as a means of reinforcing its curriculum with practical and real world experiences.

ABOUT THE DEPARTMENT

The MBA (Master of Business Administration) Programme

An MBA programme provides a graduate with a flexible degree which can help increase the awareness of general business knowledge and enhance understanding in any particular business domain. Typically an MBA helps the graduate to become more marketable across a wider range of work-profiles and across countries; move upwards in a company into managerial cadre; develop an extensive professional network or even set up one's own business.

Senior positions in business involve responsibilities that need good functional understanding of management of human resources and financial resources. These resources need to be utilized in a cost-effective manner with the best operational efficiency. An MBA helps develop a fundamental understanding of such knowledge across domains like human resources, finance, marketing, operations and information technology that is not normally received from any single focused undergraduate degree programme. Acquiring an MBA is a process filled with learning new skills, studying methodology and discussing industry related career employment opportunities.

Workshop Programme on Industries Expectations

Information industries are considered important for several reasons. Even among the experts who think industries are important, disagreements may exist regarding which reason to accept and which to reject.

First, information industries is a rapidly growing part of economy. The demand for information goods and services from consumers is increasing. In case of consumers, media including music and motion picture, personal computers, video game-related industries, are among the information industries. In case of businesses, information industries include computer programming, system design, so-called FIRE (finance, insurance, and real estate) industries, telecommunications, and others. When demand for these industries are growing nationally or internationally, that creates an opportunity for an urban, regional or national economy to grow rapidly by specializing on these sectors.

TOPICS TO BE COVERED ON THE TRAINING

- hospitality industry expectations
- industry expectations grad rates
- engineering industry expectations
- industry expectations competencies
- industry expectations skills

A workshop on

Control Techniques in Power Electronics

12th to 16th June 2017

Bhogapuram, Vengaloor-535216

Importance of Control techniques in Power Electronics:

Power Electronics is a technology that deals with the conversion and control of electrical power with high-efficiency switching mode electronic devices for a wide range of applications. These include DC and AC power supplies.

This study discusses the changing techniques of controllers used in straightforward and complex analytical methods. The controllers aim to achieve satisfactory performance at steady state error because of its necessary usefulness in connected converters and ability to boost disturbance refusal by cancelling voltage harmonics. So, it provides different control methods and types of controllers used in Power Electronics.

Topics to be covered:

- Introduction to Power Electronics.
- Modelling of DC to DC Power converters.
- Practical experience on solar resource measurement and analysis.
- Design philosophy and system designing.
- About PV modules, inverters, Batteries and other technologies.
- Hands on application of programming using MATLAB/Simulink.
- Applications, advantages and disadvantages.

**MIRACLE EDUCATIONAL SOCIETY
GROUP OF INSTITUTIONS**

(Approved by AICTE & Affiliated to JNTU, Kakinada)
Miracle City, Bhogapuram,
Vizianagaram-535214 Andhra Pradesh

Website: www.mielokam.com

IMPORTANCE OF WORKSHOP

Unlike other renewable energy sources, biomass can be converted directly into liquid fuels, called "biofuels," to help meet transportation fuel needs. The two most common types of biofuels in use today are ethanol and biodiesel, both of which represent the first generation of biofuel technology.

The work on cellulosic ethanol provides a valuable springboard for advances in hydrocarbon biofuels also known as "drop-in" fuels, which can serve as petroleum substitutes in existing refineries, tanks, pipelines, pumps, vehicles, and smaller engines.

TOPICS TO BE COVERED IN THE TRAINING

- > Overview of Bio Fuel Technology
- > What are Bio Fuels?
- > Why Bio Fuels?
- > Ethanol
- > Bio Diesel
- > Hydrocarbon Bio Fuels
- > Importance of Bio Fuels
- > Advantages Of Bio Fuels
- > Applications Of Bio Fuels

Located in Miracle City, Bhagapattam, Vizianagaram district of Andhra Pradesh, MES provides its learning community state-of-the-art facilities, infrastructure and a competent faculty. The Institute encourages collaborative learning between industry and academia as a means of rendering its curriculum with practical and real world experiences.

One of the most sought after courses amongst engineering students, Computer Science Engineering (CSE) is an academic programme which integrates the field of computer Engineering and Computer Science. The programme, which lays emphasis on the basics of computer programming and networking, comprises a plethora of topics. The said topics are related to computation, algorithms, programming languages, program design, computer software, computer hardware etc. Computer science engineers are involved in many aspects of computing, from the design of individual microprocessors, personal computers and supercomputers to circuit designing and writing software that powers them.

The course is offered by technical institutes across India and Abroad at the UG (Undergraduate) and PG (Postgraduate) level where students are awarded B.Tech and M.Tech degree respectively. Students pursuing the course will be taught about design, implementation and management of information system of computer hardware and software. Even though CSE is one the engineering specializations, candidates pursuing the programme have the option of further choosing amongst various other specializations like Telecommunication, web designing, computer hardware & software implementation & maintenance etc.

(Approved by A.I.C.T.E & affiliated to J.V.T.U., Kakinada)
Miracle City, Bhagapattam,
Vizianagaram-535216/Andhra Pradesh

Website: www.adnlokam.com

IMPORTANCE OF WORKSHOP

The term MEAN stack refers to a collection of JavaScript based technologies used to develop web applications. MEAN is an acronym for MongoDB, ExpressJS, AngularJS and NodeJS. From client to server to database, MEAN (CRUD) stack JavaScript. This workshop explores the basics of the MEAN stack and shows how to create a simple Backend Web application.

MEAN is a free and open-source JavaScript software stack for building dynamic web sites and web applications. All the MEAN stack technologies are open source and available for free. It helps the development process using libraries and public repositories and reduces the development cost. MongoDB helps to deploy cloud functionalities within the app by reducing the disk space cost.

TOPICS TO BE COVERED IN THE WORKSHOP

- Introduction to MEAN STACK
- Importance of MEAN STACK
- Setting up MongoDB
- Express
- Angular
- Adh
- NodeJS
- Implementation
- Testing of API
- Future of MEAN STACK

RESOURCE PERSONS

Dr. P. N. Singh, Professor,
Department of CSE,
GMRIT, Rajam.

ELIGIBILITY

This course enables you to become an expert MongoDB developer and administrator by gaining in-depth knowledge of MongoDB and mastering skills of data modeling, ingestion, query, sharding, and data replication. This course enables you to grasp the fundamentals of JavaScript required to master MEAN stack.

The limited no. of registration is 200

About the Institution:

MIRACLE EDUCATIONAL SOCIETY GROUP OF INSTITUTIONS Established in the year 2008 approved by the All India Council for Technical Education (AICTE) and affiliated to Jawaharlal Nehru Technological University, Kakinada. Located in Miracle City, Bhogapuram, Vizianagaram district of Andhra Pradesh, MES provides its learning community state-of-the-art facilities, infrastructure and a competent faculty. The institute encourages collaborative learning between industry and academia as a means of reinforcing its curriculum with practical and real world experiences.

About the Department:

The Department of Civil Engineering is a professional engineering discipline that deals with the design, construction and maintenance of the physical and naturally built environment, including public works such as roads, bridges, canals, dams, airports, sewerage systems, pipelines, structural components of buildings, and railways.

5th Annual Conference
On

Training programme on Building
Information Modelling (BIM) and
Construction Project Management
(CPM)

26th to 31st July 2017

About construction project management (CPM):

The management of construction projects requires knowledge of modern management as well as an understanding of the design and construction process. Construction projects have a specific set of objectives and constraints such as a required time frame for completion. While the relevant technology, institutional arrangements or processes will differ, the management of such projects has much in common with the management of similar.

Topics to be covered:

- Cost Overruns in Construction Projects
- Supply Chain Management
- Development of a prediction model for Cost Overruns in Construction Projects
- Delay Management in a Construction Management
- Using Advance Methods and Replacement materials in reducing the Cost of Construction.
- Prediction of Cost Overruns using Artificial Intelligence
- Development of Smart Village or Smart City

Resource Persons:

Dr. G. Jaya Kumar Professor
Dept. of CIVIL, SVPEC College

Co-Ordinators

Ms. A. Satyavani Asst. Prof
Mr. M. CH. G. Subash Asst. Prof

Organizing Committee

ABOUT THE DEPARTMENT

The MCA (Master of Computer Applications) Programme

"MCA (Master of Computer Applications) is a professional master's degree in computer science. It focuses on providing a theoretical as well as practical training to students in the related field." Computer Applications is a use of computer to solve a problem or to accomplish a particular job.

Master of Computer Applications (MCA) is a three-year (six semesters) professional Master's Degree in computer science awarded in India. The course was designed to meet the growing demand for qualified professionals in the field of Information Technology.

So, it is a better choice to grow your career in IT sector and MCA course is the best option to make your career in IT sector because MCA is not only a post graduate program but it is also a complete professional making course for students to grow a successful career in IT sector.

IMPORTANCE OF TRAINING

In computer science artificial intelligence, sometimes called machine intelligence, is intelligence demonstrated by machines. In contrast to the natural intelligence displayed by humans.

Artificial Narrow Intelligence (ANI)

Artificial General Intelligence (AGI)

Artificial Super Intelligence (ASI)

AI works by combining large amounts of data with fast, iterative processing and intelligent algorithms, allowing the software to learn automatically from patterns or features in the data. Creative construction is a subfield of AI that strives for a natural, human-like interaction with machines.

AI is the use of computer science programming to imitate human thought and action by analyzing data and circumstances, solving or anticipating problems and learning or self-teaching to adapt to a variety of tasks.

TOPICS TO BE COVERED IN THE TRAINING

- Artificial intelligence (AI) is the ability of a computer program or a machine to think and learn. It is also a field of study which tries to make computers "smart". They work on their own without being encoded with commands. John McCarthy came up with the name "artificial intelligence" in 1955.
- Artificial intelligence can be used in many sectors such as transportation, finance, healthcare, banking etc. Artificial Intelligence application can serve in almost any Sectors right from suggesting information to even in your banking transactions. Impact of AI - which allows the machines to exhibit intelligence.
- In artificial intelligence, model-based reasoning refers to an inference method used in expert systems based on a model of the physical world. With this approach, the main focus of application development is developing the model.
- Google-Assistant is an artificial intelligence-powered virtual assistant developed by Google.

ABOUT THE PROGRAMME

The MBA (Master of Business Administration) Programme

An MBA programme provides a graduate with a flexible degree which can help increase the awareness of general business knowledge and enhance understanding in any particular business domain. Typically an MBA helps the graduate to become more marketable across a wider range of work-profiles and across industries, move upwards in a company into managerial cadre, develop an extensive professional network or even set up one's own business.

Senior positions in business involve responsibilities that need good functional understanding of management of human resources and financial resources. These resources need to be utilized in a competitive market with the best operational efficiency. An MBA helps develop a fundamental understanding of such knowledge across domains like human resources, finance, marketing, operations and information technology that is not normally received from any single focused undergraduate degree programme. Acquiring an MBA is a process filled with learning new skills, studying methodologies and discussing industries that provide employment opportunities.

Importance of the Capital Market

The capital market plays an important role in mobilising saving and channel is in them into productive investments for the development of commerce and industry. As such, the capital market helps in capital formation and economic growth of the country. We discuss below the importance of capital market.

The capital market acts as an important link between savers and investors. The savers are lenders of funds while investors are borrowers of funds. The savers who do not spend all their income are called, "Surplus units" and the borrowers are known as "deficit units". The capital market is the transmission mechanism between surplus units and deficit units. It is a conduit through which surplus units lend their surplus funds to deficit units.

(Approved by AICTE & Affiliated to N.T.U., Kakinada)

Miracle City, Bhogapuram,
Vizianagaram-535216 Andhra Pradesh

Website: www.ednlokam.com

IMPORTANCE OF TRAINING

The data is a field that really works in analyzing economically, extract information from its observation that with data sets that are too large or complex to be dealt with by traditional data processing application software.

An example of big data could be, quadrillions (1,024 quadrillion) or, quadrillions (1,024 quadrillion) of data consisting of billions to trillions of records of millions of records all from different sources (e.g., Web, sales, customer contact system, social media, mobile data and so on).

"Big data" is a field that really works in analyzing economically, extract information from its observation that with data sets that are too large or complex to be dealt with by traditional data processing application software. Big data sets are usually associated with their key attributes: volume, variety, and velocity.

FACTS TO BE CONSIDERED BY THE TRAINERS

- Big data is used to better understand customers and their behaviors and preferences. Companies are keen to extract their traditional data sets with social media data, however less as well as text analysis and sensor data to get a more complete picture of their customers.
- The bulk of big data generated comes from three primary sources: social data, machine data and transactional data.
- Big data analytics examines large amounts of data to uncover hidden patterns, correlations and other insights. With today's technology, it's possible to analyze constantly and get answers from it almost immediately – an effort that's slower and less efficient with more traditional business intelligence solutions.
- The big data tool used to store and analyze data... We can convert them into two formats and Querying (Analysis). 1. Apache Hadoop: Apache Hadoop is a Java based free software framework that can effectively store large amount of data in a cluster.

In the month of December

Seminar on Design of Buildings

18th to 23rd December 2017

Importance of Seismic Design of Building:

Earth Quake Engineering is an interdisciplinary branch of engineering that designs and analyzes structures, such as building and bridges, with earthquake in mind. Its overall goal is to make such structures more resistant to earthquakes. An earthquake engineer aims to construct structures that will not be damaged in minor shaking and will avoid serious damage or collapse in a major earthquake. Earthquake engineering is the scientific field concerned with protecting society, the nature environment, and the man-made environment from earthquake by limiting the seismic risk to socio-economically acceptable level.

Topics to be covered:

- Introduction to Seismic design
- introduction to earthquake engineering
- causes of earthquakes
- prevention techniques
- foresee the potential consequences of strong earthquake on urban areas and civil infrastructure
- Design construct and maintain structure to perform at earthquake exposure up to the expectation in compliance

A Seven days workshop
on
ROBOTICS

19th to 26th December 2017

Importance of ROBOTICS

Robotics is a scientific and engineering discipline that is focused on the understanding and use of artificial, embodied capabilities. The people who work in this field (roboticists) come from mechanical engineering, electronic engineering, information engineering, computer science, and other fields. On the engineering side, roboticists deal with the design, construction, operation, and use of robots, especially through computer systems for their control, sensory feedback, and information processing. On the scientific side, roboticists study how a robot's environment and design affect how well it does its job.

Topics to be covered:

- Introduction to robotics
- Basics of Robotics
- Mechanical working and Designing of robotics
- About microcontrollers, sensors electronics devices
- Different types of motors and applications
- Artificial Intelligence, Applications
- Preparing models of robots
- types of robots used in industries
- advanced robotics working
- Applications, advantages and disadvantages.

Bhogapuram, Vizianagaram - 535216

WORKSHOP OBJECTIVES

- Rapidly architect an embedded system, targeting the ARM processor of Zynq Device using Vivado and IP Integrator
- Create a custom peripheral and add it to the system
- Debug using Vivado hardware analyzer
- Use Vivado HLS to generate an IP-XACT compliant hardware accelerator
- Design HDL based module and verify using Mentor Graphics front end tools
- ASIC & FPGA synthesis using Leonardo & precision
- Design layout using Pcells & verify with Cadence
- Post layout verification using Pcells design suite
- Design of Analog mixed modules & verify using Questa ADEMS

WORKSHOP CONTENT

7-Series Architecture Overview

Vivado Design Flow

Lab 1: Creating an HDL Design

Lab 2: Xilinx Design Constraints

IP Integrator and Embedded System Design Flow Lab

2: Create a Processor System using IP Integrator

Embedded System Design with Custom IP &

Debugging using Vivado Logic Analyzer and SDK Lab

4: Debugging using Vivado Logic Analyzer cores

Introduction to High-Level Synthesis with Vivado

HLS Lab 5: Creating a Processor System using

Accelerator Lab 5: Hardware Co-simulation of FIR

Filter using Xilinx Vivado System Generator.

Fundamentals of VLSI chip design

Methodologies Lab 1: HDL flow for front end

Concepts of ASIC Full custom & Semi custom

Lab 2: RTL to GDSII using semicustom design flow

Lab 3: ASIC Full custom design & verification

Concepts & Demo on Analog Mixed design & verification

Eight-Day Workshop On

**VLSI Design with Advanced
Tools and Techniques(Xilinx
Vivado Software ,Mentor
Graphics,Zynq Hardware
Board)**

5th-12th March 2018

Venue:

Department of
Electronics & Communication Engineering

**Miracle Educational Society Group Of
Institutions**

Bhogapuram (M) Vizianagaram(D)

ABOUT THE COLLEGE

MIRACLE EDUCATIONAL SOCIETY GROUP OF INSTITUTIONS Established in the year 2009 approved by the All India Council for Technical Education (AICTE) and affiliated to Jawaharal Nehru Technological University, Kakinada. Located in Miracle City, Bhogapuram, Vizianagaram district of Andhra Pradesh, MES provides its learning community state-of-the-art facilities, infrastructure and a competent faculty. The Institute encourages collaborative learning between industry and academia as a means of reinforcing its curriculum with practical and real world experiences.

ABOUT THE DEPARTMENT

The Department of Electronics and Communication Engineering in MESG is intent on creative and technologically advanced skill transfer to the students through teaching, mentoring and counseling. It regularly organizes short-term courses, seminars, symposiums, workshops and invited talks by eminent faculty from reputed institutions and industry experts, to keep the students abreast of the latest technological developments in related fields. The services of some academicians of high repute have been utilized by the department with the objective of supplementing teaching, mentoring and guiding the students as well as faculty members.

About Applyvolt Technologies

Applyvolt Technologies provides Eco-System support to Indian Academia in Engineering Higher Education, in the field of Embedded Systems thereby enabling the delivery of quality education. CoreEL university achieves this by providing state-of-the-art products from XILINX, MENTOR GRAPHICS, MATLAB, VxWorks, Speed-goat (Rapid Controller Prototyping, Hardware-in-the-Loop simulation, and deployment) PCB Design Tools from Mentor Graphics, Analog Discovery Kits from Digilent (Analog Discovery kit can replace the conventional regulated power supply, Function Generator, Oscilloscope, and smaller parts like Bread board etc with one portable, compact and power effective and low cost solution!) to universities. Multiyear application engineering support on these products, Faculty and Student training, providing industry specific inputs to update the curriculum and helping universities set up Centers of Excellence in Embedded Systems arena.

PRE-REQUISITES

Digital design experience
Basic HDL knowledge (VHDL or Verilog)
Digital logic and FPGA design experience

REGISTRATION DETAILS

Participant fee : Rs 500/-

MIRACLE EDUCATIONAL SOCIETY

GROUP OF INSTITUTIONS Established in the year 2009 approved by the All India Council for Technical Education (AICTE) and affiliated to Jawaharlal Nehru Technological University, Kakinada. Located in Miracle City, Bhogapuram, Vizianagaram district of Andhra Pradesh, MES provides its learning community state-of-the-art facilities, infrastructure and a competent faculty. The Institute encourages collaborative learning between industry and academia as a means of reinforcing its curriculum with practical and real world experiences.

One of the most sought after courses amongst engineering students, Computer Science Engineering (CSE) is an academic programme which integrates the field of computer Engineering and Computer Science. The programme, which lays emphasis on the basics of computer programming and networking, comprises a plethora of topics. The said topics are related to computation, algorithms, programming languages, program design, computer software, computer hardware etc. Computer science engineers are involved in many aspects of computing, from the design of individual microprocessors, personal computers and supercomputers to circuit designing and writing software that powers them.

The course is offered by technical institutes across India and Abroad at the UG (Undergraduate) and PG (Postgraduate) level where students are awarded B.Tech and M.Tech degree respectively. Students pursuing the course will be taught about design, implementation and management of information system of computer hardware and software. Even though CSE is one of the engineering specializations, candidates pursuing the programme have the option of further choosing amongst various other specializations like Telecommunication, web designing, computer hardware & software implementation & maintenance etc.

A Workshop
on
No-SQL Databases
06 - 15 Mar, 2018

Organized by
Department of CSE

MIRACLE EDUCATIONAL SOCIETY
GROUP OF INSTITUTIONS
(Approved by AICTE & Affiliated to JNTU, Kakinada)
Miracle City, Bhogapuram,
Vizianagaram-535216 Andhra Pradesh

Website: www.edukam.com

IMPORTANCE OF WORKSHOP

NoSQL, which stands for "not only SQL," is an alternative to traditional relational databases in which data is placed in tables and data schema is carefully designed before the database is built. NoSQL databases are especially useful for working with large sets of distributed data.

Every application whether is developed using .NET or any other programming language, it requires some external source to store and access data and this can either be a local network, a cloud file system or even a database. While sources like network and cloud file systems store the unstructured data, the structured data is usually stored in a typical relational database management system or RDBMS.

TOPICS TO BE COVERED IN THE WORKSHOP

- NewSQL vs NoSQL
- MongoDB vs Couch
- Document Store Architecture
- Mongo Nightmares
- Redis in Practice
- Introducing and Using Data Anomalies in NoSQL
- Many Databases or One Database with Many Documents
- Performance Metrics in NoSQL
- GeoQuerying in MongoDB
- How Big Should My Mongo Documents Be (And Other Optimizations)
- Using Map Reduce in Document Storage DBs (Mongo and Couch)
- Proper Indexes in MongoDB and Couch
- The NoSQL In Memory DBs
- Intro to NoSQL (Not Only SQL)
- Primer: Queries in Mongo

RESOURCE PERSONS

Dr. Bala Subramanyam , Professor,
Department of CSE,
Sri Devi Engineering College,
Hyderabad.

ELIGIBILITY

There are many different types of databases in use with the main ones being relational, document-store, key-value, graph, or columnar. Relational databases are commonly referred to as SQL databases because they use SQL as a way of storing and querying. The limited no. of registration is 200

IMPORTANT DATES

Participants should confirm their interest on or before 5th Mar 2018
Workshop Dates: 6th to 15th, Mar, 2018

REGISTRATION FEES

Faculty/Research Scholar: Rs. 500
Participant from any college: Rs. 750

For Any Queries contact to:

Assoc. Prof. P. Praveen

A Six Day Workshop
on
VLSI Design Using Verilog
HDL

18th to 23rd March 2018

Importance of Digital Signal Processing using MATLAB

Verilog is a **HARDWARE DESCRIPTION LANGUAGE (HDL)**. It is a language used for describing a digital system like a network switch or a microprocessor or a memory or a flip-flop. It means, by using a HDL we can describe any digital hardware at any level. Designs, which are described in HDL are independent of technology, very easy for designing and debugging, and are normally more useful than schematics, particularly for large circuits.

Verilog supports a design at many levels of abstraction. The major three are -

- Behavioral level
- Register-transfer level
- Gate level

Topics to be covered:

- Introduction
- Basics of VLSI Design using Verilog HDL
- Discuss about basics of Verilog Programming
- Designing of Various VLSI Schematics and layouts using Verilog HDL.

on

"PSPICE"

10th to 16th JULY 2018

Importance of PSPICE

Pspice software is widely used circuit simulation software using which examples from Analog electronics such as biasing of transistors, characteristics of BJT, diodes, MOSFET and Op-amp circuits were simulated. So, it is important to conduct a workshop on P-spice to give the basic knowledge on this. Spice (Simulation Program for Integrated Circuits Emphasis) is a general purpose analog circuit simulator that is used to verify circuit design and to predict the circuit behavior. P-Spice is a PC Version of SPICE and H-Spice a version that runs on workstation and larger computers.

Topics to be covered:

- Introduction, Modeling a semiconductor, Designing of Simulink blocks and
- Other power electronics circuits by using PSPICE Software
- Simulation of Half wave and Full wave rectifiers.
- Applications of Rectifiers
- Fundamentals of Circuit Simulation.
- Fundamentals of PSpice software
- Components information systems and PSpice
- Applications, advantages and disadvantages.

ABOUT THE DEPARTMENT

The MECHANICAL ENGINEERING Programme

Mechanical Engineering is the mother of all branches. The contribution of this branch is enormous in the growth of technology over the centuries. B.Tech courses varies from Material Research to Machinery Development. Those who wants to develop/acquire breadth and depth of knowledge and skills required to design fabricate and maintenance of things ranging from a safety pin to a space craft. Those who are interested to work with massive machines to tiny precision instruments/devices. Acquiring an Mechanical degree is a process filled with learning new skills, studying methodologies and discussing industries that provide employment opportunities.

MICROMACHINING

One week hands on national
workshop

On

MicroMachining

Organized by

**Department of
MECHANICAL ENGINEERING**

**MIRACLE EDUCATIONAL SOCIETY
GROUP OF INSTITUTIONS**

(Approved by A.I.C.T.E. & Affiliated to JNTU: Kakinada)
Miracle City, Bhuvanagaram,
Vizianagaram-535214 Andhra Pradesh

Website: www.edulokam.com

IMPORTANCE OF WORKSHOP

Micromachining refers to techniques for fabrication of 3D structures on the micrometer scale. Recent demands for micro parts have required us to manufacture variety of micro components used in different fields from amusement electronics to biomedical implants. The convenience and value of micro products can be substantially increased with reduced size and weight. Micro parts may have overall size of few millimeters but it has tiny features that falls in micro range from 1µm to 50µm. Feature size of 100µm is common in micromachining. This means small as hair size, the average hair diameter is about 100µm. The participants were getting more knowledge on various Micromachining processes and their applications.

TOPICS TO BE COVERED IN THE TRAINING

- Overview of MicroMachining
- What is MicroMachining?
- Why MicroMachining?
- ABRASIVE JET MICRO MACHINING
- ULTRASONIC MICRO MACHINING
- ABRASIVE WATER JET MICRO MACHINING
- ABRASIVE FLOW FINISHING
- MAGNETIC ABRASIVE FINISHING
- LASER BEAM MICROMACHINING

RESOURCE PERSONNEL

Mr. Chandrashekar Chennuri,
Managing director, Tercet laboratories,
Noida.

ELIGIBILITY

Workshop is aimed at honing the teaching and research skills of perspective, new and seasoned, researchers and trainers.

The limited no. of registration is 60.

IMPORTANT DATES

Participants should confirm their interest on or before 24th July 2018

Training Dates: 25-07-2018 to 01-08-2018

REGISTRATION FEE

Faculty/Research Scholar: Rs. 500
Participant from any college: Rs. 750

For Any Queries contact to:
S.Kiran Kumar,
Assistant professor
Mobile: +91-812-266253
email: Inachennuri@gmail.com

NOTE: At the end of this workshop, a small competition will be organized among the participating faculty's and winners will be awarded with a certificate of excellence.

One week hands on national workshop

A Eight days workshop
On

IB's Max Industrial Training
Programme

06th to 13th Aug 2018

About 3D's Max :

Software can handle several stages of the animation pipeline including pre-visualization, layout, cameras, modeling, texturing, rigging, animation, VFX lighting, and rendering. As one of the most widely used 3D packages in the world, 3ds Max is an integral part of many professional studios and makes up a significant portion of their production pipeline for games and movies.

Topics to be covered:

- computer graphics program.
- 3D models of structures
- Animations of building designs
- Applications, advantages and disadvantages
- digital images of structures

The Institute encourages collaborative learning between industry and academia as a means of reinforcing its curriculum with practical and real world experiments.

MIRACLE EDUCATIONAL SOCIETY

One of the most sought after courses amongst engineering students, Computer Science Engineering (CSE) is an academic programme which integrates the field of computer Engineering and Computer Science. The programme, which lays emphasis on the basics of computer programming and networking, comprises a plethora of topics. The said topics are related to computation, algorithms, programming languages, program design, computer software, computer hardware etc. Computer science engineers are involved in many aspects of computing, from the design of individual microprocessors, personal computers and supercomputers to circuit designing and writing software that powers them.

The course is offered by technical institutes across India and Abroad at the UG (Undergraduate) and PG (Postgraduate) level where students are awarded B.Tech and M.Tech degree respectively. Students pursuing the course will be taught about design, implementation and management of information system of computer hardware and software. Even though CSE is one of the engineering specializations, candidates pursuing the programme have the option of further choosing amongst various other specializations like Telecommunication, web designing, computer hardware & software implementation & maintenance etc.

IMPORTANCE OF WORKSHOP

The iterative aspect of machine learning is important because as models are exposed to new data, they are able to independently adapt. They learn from previous computations to produce reliable, repeatable decisions and results. It's a science that's not new – but one that has gained fresh momentum.

Because of new computing technologies, machine learning today is not the machine learning of the past. It was born from pattern recognition and the theory that computers can learn without being programmed to perform specific tasks; researchers interested in artificial intelligence wanted to see if computers could learn from data.

TOPICS TO BE COVERED IN THE WORKSHOP

- Introduction of Machine Learning
- Branches of Machine Learning
- Applications Of Machine Learning
- Machine Learning Tools
- ML hardware
- ML Methods
- ML Research
- Future of ML

RESOURCE PERSONS

Dr. T. Srinivas , Professor,

A Nine Day Workshop
on
Robotics

4th to 12th September 2018

A Brief about Robotics:

Robotics is an interdisciplinary branch of engineering & science that includes mechanical engineering, electronic engineering, information engineering, computer science, and others. Robotics deals with the design, construction, operation, and use of robots, as well as computer systems for their control, sensory feedback, and information processing.

These technologies are used to develop machines that can substitute for humans and replicate human actions. Robots can be used in many situations and for lots of purposes, but today many are used in dangerous environments (including bomb detection and deactivation), manufacturing processes, or where humans cannot survive (e.g. in space, under water, in high heat, and clean up and containment of hazardous materials and radiation). Robots can take on any form but some are made to resemble humans in appearance. This is said to help in the acceptance of a robot in certain replicative behaviors usually performed by people. Such robots attempt to replicate walking, lifting, speech, cognition, or any other human activity. Many of today's robots are inspired by nature, contributing to the field of bio-inspired robotics.

Topics to be covered:

- Introduction
- Basics of Robotics
- Different types of Robots,
- Applications of Robots in various fields like industries, security, automation etc

ABOUT THE DEPARTMENT

The MCA (Master of Computer Applications) Programme

"MCA (Master of Computer Applications) is a professional master's degree in computer science. It focuses on providing a theoretical as well as practical training to students in the related field." Computer Applications is a use of computer to solve a problem or to accomplish a particular job.

Master of Computer Applications (MCA) is a three-year (six semesters) professional Master's Degree in computer science awarded in India. The course was designed to meet the growing demand for qualified professionals in the field of Information Technology.

So, it is a better choice to grow your career in IT sector and MCA course is the best option to make your career in IT sector because MCA is not only a post graduate program but it is also a complete professional making course for students to grow a successful career in IT sector.

(Approved by A.I.C.T.E & Affiliated to JNTU, Kakinada)

Miracle City, Bhogapuram,
Vizianagaram-535216 Andhra Pradesh

Website: www.edulokam.com

IMPORTANCE OF TRAINING

The Internet of Things (IoT) is a system of interconnected computing devices, mechanical and digital machines, objects, animals or people that are provided with unique identifiers (UIDs) and the ability to transfer data over a network without requiring human-to-human or human-to-computer interaction.

Cloud computing is the on-demand availability of computer system resources, especially data storage and computing power, without direct active management by the user. The term is generally used to describe data centers available to many users over the Internet.

IoT is a sensor network of billions of smart devices that connect people, systems and other applications to collect and share data.

Cities will transform into smart cities through the use of IoT connected devices.

TOPICS TO BE COVERED IN THE TRAINING

- > **Cloud Computing** is the use of hardware and software to deliver a service over a network (typically the Internet). With **cloud computing**, users can access files and use applications from any device that can access the Internet. An example of a Cloud Computing provider is Google's Gmail.
- > In **cloud computing**, the word "cloud" (also thought as "the cloud") is used as a metaphor for "the Internet," so the phrase **cloud computing** means a type of Internet-based computing, where different services — including servers, storage and applications — are delivered to an organization's computers and devices through.
- > **IoT** has evolved from the convergence of wireless technologies, microelectromechanical systems (MEMS), microservices and the Internet. Taking MEMS to the next level, IoT is a sensor network of billions of smart devices that connect people, systems and other applications to collect and share data.

MIRACLE EDUCATIONAL SOCIETY

GROUP OF INSTITUTIONS Established in the year 2009 approved by the All India Council for Technical Education (AICTE) and affiliated to Kalamandalam Sree Narayana Guru University, Kalamandalam, Kollam & Miracle City, Hingnapuram, Varanagarum campus of Andhra Pradesh. MEI provides an learning environment state-of-the-art facilities, infrastructure and a supportive faculty. The Institute arranges collaborative learning between industry and academia as a means of transferring its curriculum with practical and real-world experience.

ABOUT THE DEPARTMENT

The MBA (Master of Business Administration) Programme

An MBA programme provides a graduate with a flexible degree which can help increase the awareness of general business knowledge and enhance understanding in any particular business concern. Typically an MBA helps the graduate to secure a more marketable career, a wider range of work-profiles and across industries, move upwards in a company or to managerial roles, develop an extensive professional network or start up one's own business.

Senior positions in business require responsibilities that need good financial understanding, of management of human resources and financial resources. These responsibilities need to be fulfilled in a competitive market with the best utilisation of resources. An MBA helps develop a fundamental understanding of such knowledge across domains like human resources, finance, marketing, operations and information technology that is an integral part of business management. Admission to MBA is a process filled with learning new skills, studying methodologies and acquiring techniques that provide employment opportunities.

IMPORTANCE OF Leadership Quality Significance

Foremost, it is crucial that you understand the importance of leadership skills. Being an effective leader is a hard row to hoe, but the reward it yields is worth the trouble. It is not the position of power but your leadership skills that help you think in a unique and out-of-box ways.

To emerge as a real leader, you need mastery over your niche on skills and knowledge. Simultaneously, you need to display specific important leadership skills.

These skills help you create an encouraging and productive work environment, command love, respect, and devotion from the team members and scale success heights which seemed impossible earlier. They help a leader take initiatives, work in an innovative and pro-active way to meet the business ROIs and foster a healthy work environment.

TOP 5 SKILLS REQUIRED BY THE LEADERS

- Communication : learning how to effectively communicate is critical
- Execution : ...
- Change Management : ...
- Empowerment : ...
- Team Performance : ...

(Approved by AICTE & Affiliated to JETU, Kavaratti)
Miracle City, Bhogapuram,
Villanagaram-535216-Andhra Pradesh

Website: www.melokam.com

IMPORTANCE OF WORKSHOP

An Advanced internal combustion engine (ICE) is a heat engine in which the combustion of a fuel occurs with an oxidiser (usually air) in a combustion chamber that is an integral part of the working fluid flow circuit. In an internal combustion engine, the expansion of the high-temperature and high-pressure gases produced by combustion applies direct force to some component of the engine. The force is applied typically to pistons, turbine blades, rotors or a nozzle. This force moves the component over a distance, translating chemical energy into useful mechanical energy.

The student will be able to explain Design parameters like fuel-air mixture and cycle analysis, gas exchange processes and motion of charges in the cylinder and its effects on combustion process in SI and CI engines and control the pollutant formation, flow in exhaust and intake manifolds, modern concepts like Lean burn, HCCI, GDI.

TOPICS TO BE COVERED IN THE WORKSHOP

- > Overview of Advanced I.C. Engines
- > What are Advanced I.C. Engines?
- > Why Advanced I.C. Engines?
- > Spark Ignition Engines
- > Compression Ignition Engines
- > Alternative Fuels
- > Recent Trends
- > Importance of Advanced I.C. Engine

KEYNOTE PERSON

Dr. Anil Meena,
Managing director, Radiant labs,
Anantapuram.

ELIGIBILITY

Workshop is aimed at honing the teaching and research skills of perspective new and seasoned, researchers and trainers.

The limited no. of registration is 60.

IMPORTANT DATES

Participants should confirm their interest on or before 13th Dec 2018.

Training Dates: 14-12-2018 to 21-12-2018

REGISTRATION FEE

Faculty/Research Scholar: Rs.500
Participant from any college: Rs.750

For Any Queries contact to:

Mr. S.Ganapathi,
Assistant professor
Mobile: +91-9037201091
email: suganapathi@radiantlabs.com

NOTE: At the end of this workshop, a small competition will be organized among the participating Faculty's and winners will be awarded with a "Certificate of Excellence".

Located in Miracle City Bhogapuram, Visanagaram district of Andhra Pradesh. MES provides its learning community state-of-the-art facilities, infrastructure and a competent faculty. The Institute encourages collaborative learning between industry and academia as a means of rendering its curriculum with practical and real world experiences.

About the Department:

The Department of Electrical & Electronics Engineering has well qualified faculty with specializations which include power electronics, control engineering, embedded systems, power systems, computer applications in industrial drives, etc. The department is continuously updating its facilities to make the students excel in all respects in the area of electrical engineering. The laboratories are well equipped as per the curriculum and also to carry out student project work. The department has taken various initiatives to reduce the gap between academics and industry.

A workshop on

"Advancements in
Switchgear Protection and
Mechatronics"

4th to 10th FEBRUARY 2019

Importance of PSPICE

Switchgears are the switching devices designed to protect, meter and control power generation, transmission and distribution equipment and an electric motor control systems. This workshop provides the knowledge on advanced technologies in switchgear. Mechatronics focuses on the engineering of both electrical and mechanical systems, and also includes a combination of robotics, electronics, computer, telecommunications, systems, control and product engineering.

Topics to be covered:

- Introduction to switchgear and Mechatronics.
- Introduction to circuit Breakers, Relays, fuses and Isolators etc.
- Protective measures and advancements in switchgear, general assemblies
- Technomatix, Industrial Robotics
- Basics of PLC Programming
- Essential for designing Mechatronics, HMI, Networking
- Applications, advantages and disadvantages.

The Institute encourages collaborative learning between industry and academia as a means of reinforcing its curriculum with practical and real world experiences.

ABOUT THE DEPARTMENT

The MCA (Master of Computer Applications) Programme

"MCA (Master of Computer Applications) is a professional master's degree in computer science. It focuses on providing a theoretical as well as practical training to students in the related field." Computer Applications is a use of computer to solve a problem or to accomplish a particular job.

Master of Computer Applications (MCA) is a three-year (six semesters) professional Master's Degree in computer science awarded in India. The course was designed to meet the growing demand for qualified professionals in the field of Information Technology.

So, it is a better choice to grow your career in IT sector and MCA course is the best option to make your career in IT sector because MCA is not only a best graduate program but it is also a complete professional making course for students to grow a successful career in IT sector.

on

Python and Machine Learning

05th -09th February 2019

Organized by

Department of MCA

MIRACLE EDUCATIONAL SOCIETY GROUP OF INSTITUTIONS

(Approved by AICTE & Affiliated to JNTU, Kakinada)
Miracle City, Bhogapuram,
Vizianagaram-535216 Andhra Pradesh

Website: www.edulokam.com

IMPORTANCE OF TRAINING

Python is an interpreted, high-level, general-purpose programming language. It supports multiple programming paradigms, including procedural, object-oriented, and functional programming. Python is often described as a "batteries included" language due to its comprehensive standard library.

Python is a general purpose and high level programming language. You can use Python for development, desktop GUI applications, web sites and web applications. Also, Python, as a high level programming language, allows you to focus on core functionalities of the application by taking care of routine programming tasks.

Machine learning focuses on the development of computer programs that can learn from data and use it to learn for themselves.

TOPICS TO BE COVERED IN THE TRAINING

- Machine learning is a method of data analysis that automates analytical model building. It is a branch of artificial intelligence based on the idea that systems can learn from data, identify patterns and make decisions with minimal human intervention.
- machine learning remains a relatively 'hard' problem. There is no doubt the science of advancing machine learning algorithms through research is difficult. It requires creativity, experimentation and tenacity. ... The difficulty is that machine learning is a fundamentally hard debugging problem.
- Python is easy because the code you write is readable. Also, it is an object oriented programming language. If you have basic knowledge of C and a little bit data structures and algorithm, you can master basics of Python quite comfortably.
- Python supports modules and packages, which encourages program modularity and code reuse.

TRAINER'S PROFILE

A Eight days workshop
Training Programme on
Foundation Design

12th to 19th FEB 2019

About Foundation Design:

Foundation design is the creation of a construction plan for a building foundation. It is a highly specialized function and usually performed by a structural engineer. The foundation is the structural base that stands on the ground and supports the rest of the building. Delivered over two days this training course uses notes, presentations, tutorials and delegate discussion to address the key geotechnical and structural criteria for the design of a range of foundation types commonly used for building and civil engineering structures. The emphasis is on the development of practical solutions to design problems, working to current design codes and standards. The course is fully Euro code compliant.

Topics to be covered:

- Bearing capacity and settlement in spread foundations.
- Strength limit.
- Geotechnical design of piles and pile groups.
- pile cap and ground beam systems, earth pressures on retaining structures.
- Design of reinforced concrete gravity and mass walls, embedded and gabion walls.
- Applications, advantages and disadvantages.

The Institute encourages collaborative learning between industry and academia as a means of reinforcing its curriculum with practical and real world experiences.

One of the most sought after courses amongst engineering students, Computer Science Engineering (CSE) is an academic programme which integrates the field of computer Engineering and Computer Science. The programme, which lays emphasis on the basics of computer programming and networking, comprises a plethora of topics. The said topics are related to computation, algorithms, programming languages, program design, computer software, computer hardware etc. Computer science engineers are involved in many aspects of computing, from the design of individual microprocessors, personal computers and supercomputers to circuit designing and writing software that powers them.

The course is offered by technical institutes across India and Abroad at the UG (Undergraduate) and PG (Postgraduate) level where students are awarded B.Tech and M.Tech degrees respectively. Students pursuing the course will be taught about design, implementation and management of information systems of computer hardware and software. Even though CSE is one the engineering specializations, candidates pursuing the programme have the option of further choosing amongst various other specializations like Telecommunication, web designing, computer hardware & software implementation & maintenance etc.

IMPORTANCE OF WORKSHOP

The challenges facing the international development sector are complex. Often, programmes involve multiple partners with different resources spread across the globe. High quality data is essential in making informed decisions and improving programme results. But gaining a comprehensive overview of what data is needed to best track those results can be a challenge. For programme managers and consortium leads, this can lead to an overload in admin, miscalculated budgets, and unclear results. So how do you design your programme to ensure that the right data is captured, understood, and acted upon to contribute to sustainable change

TOPICS TO BE COVERED IN THE WORKSHOP

- Introduction to Data Science
- Importance of Data Science
- Applications of Data Science Relationship to statistics
- Part of Data Mining in Data Science
- Part of AI in Data Science
- ML in Data Science
- Future of Data Science
- Demo of existing Data Science projects.

The Institute encourages collaborative learning between industry and academia as a means of reinforcing its curriculum with practical and real world experiences.

ABOUT THE DEPARTMENT

The MBA (Master of Business Administration) Programme

An MBA programme provides a graduate with a flexible degree which can help increase the awareness of general business knowledge and enhance understanding in any particular business domain. Typically an MBA helps the graduate to become more marketable across a wider range of work-profiles and across countries, move upwards in a company into managerial cadre, develop an extensive professional network or even set up ones own business.

Senior positions in business involve responsibilities that need good functional understanding of management of human resources and financial resources. These resources need to be utilized in a competitive market with the best operational efficiency. An MBA helps develop a fundamental understanding of such knowledge across domains like human resources, finance, marketing, operations and information technology that is not normally received from any single focused undergraduate degree programme. Acquiring an MBA is a process filled with learning new skills, studying methodologies and discussing industries that provide employment opportunities.

Miracle City, Bhogapuram, Vizianagaram-535116 Andhra Pradesh

Website: www.adulokam.com

IMPORTANCE OF Career Significance with Management

Career management is the combination of structured planning and the active management choice of one's own professional career. Career management was first defined in a social work doctoral thesis by Mary Valentich as the implementation of a career strategy through application of career tactics in relation to chosen career orientation (Valentich & Gipton, 1978). Career orientation referred to the overall design or pattern of one's career, shaped by particular goals and interests and identifiable by particular positions that embody these goals and interests. Career strategy pertains to the individual's general approach to the realization of career goals, and to the specificity of the goals themselves. Two general strategy approaches are adaptive and planned. Career tactics are actions to maintain oneself in a satisfactory employment situation. Tactics may be more or less assertive, with assertiveness in the work situation referring to actions taken to advance one's career interests or to exercise one's legitimate rights while respecting the rights of others.

Typically an MBA helps the graduate to become more marketable across a wider range of work-profiles and across countries, move upwards in a company into managerial roles, develop an extensive professional network or gain an up-skill in an industry.

Senior positions in business involve responsibilities that need good functional understanding of management of human resources and financial resources. These roles are used to be critical in a competitive market with the best utilisation of resources. An MBA helps develop a fundamental understanding of such knowledge across domains like human resources, finance, marketing, operations and information technology that is an essential part of most and single focused undergraduate degree programme. Appearing in MBA is a process filled with learning new skills, studying various degree and increasing to business that provide employment opportunities.
