PROGRAMME REPORT

PROGRAMME DESCRIPTION:

Provision for Vocational Educational Training Program at present is generally oriented towards job opportunities. The Purposes of this VET Programme is used as a comprehensive term referring to those aspects of the educational process involving in addition to general education. This Programme generally focuses on providing students with hands-on instruction and experience directly linked to a career in future. It also provides a clear edge in job searches because the students possess the knowledge and practical experience to enter into a specific field. This programme was held during from 17-11-2014 to 27-03-2015 in CSE department.

TOPICS COVERED:

Software testing, Global System for Mobile Communication Specification, Mobile Computing, Data Mining, Network Security, Cloud Computing, Autonomic Computing, Semantic Web and MANET.

PARTICIPENT RESPONSE:

In this Vocational Education and Training Programme all the IV B.Tech computer science students has participated and they found importance of the skill required in industry and enriching. All the participants feel satisfactory about this VET program.

PROGRAMME REPORT

PROGRAMME DESCRIPTION:

Mechatronics is an industry that plays a significant role in manufacturing. Companies end up needing professionals who have a mix of mechanical and electrical skill sets. This serves the use of technologies like PLC programming in manufacturing, and CNC machining in metal working or parts production. The participants were given training on various topics in mechatronics and its usages. This program was conducted from 17-11-2014 to 28-03-2015 in Mechanical Engineering Department.

TOPICS COVERED:

Mechatronics systems, microprocessor-based controllers, Sensors and transducers, Hydraulic and pneumatic actuating systems, Mechanical and electrical actuating systems, programmable logic controllers.

PARTICIPANTS RESPONSE:

In this Vocational Education and Training Programme all the mechanical engineering students has participated and they found importance of the skill required in industry and enriching. All the participants feel satisfactory about this VET programme.

PROGRAMME REPORT

PROGRAMME DESCRIPTION:

The nanotechnology has emerged as one of the most fascinating areas of research, bridging together different branches of science with tremendous potentials of applications in all walks of life. At the nanoscale, which covers structures ranging from 1 to 100 nanometres, the physical and chemical properties of materials undergo quantitative and qualitative changes, depending on the size of the nanomaterial. The size dependent properties of nanomaterials give a handle to engineer the properties of materials at nanoscale and exploit them for applications in various disciplines of science and interdisciplinary areas. Participants were getting more knowledge about Nano Technology applications. This program was conducted from 16-11-2015 to 04-04-2016 in Mechanical Engineering Department.

TOPICS COVERED:

SILICON CARBIDE, NANO PARTICLES OF ALUMINA AND ZIRCONIA, MECHANICAL PROPERTIES, ELECTRICAL PROPERTIES, OPTICAL PROPERTIES, INVESTIGATING AND MANIPULATING MATERIALS, NANOBIOLOGY

PARTICIPANTS RESPONSE:

In this VET Programme all the Mechanical Engineering students has participated and they found importance of the skill required in industry and enriching. All the participants feel satisfactory about this VET programme.

PROGRAM REPORT

Programme Description:

Provision for Vocational Educational Training Programme at present is generally oriented towards job opportunities. The purposes of this VET Programme is used as a comprehensive term referring to those aspects of the educational process involving in addition to general education. This programme generally focus on providing students with hands-on instruction and experience directly linked to a career in future. It also provides a clear edge in job searches because the students possess the knowledge and practical experience to enter a specific field. This programme was conducted from 21-11-2016 to 15-04-2017 in EEE department.

Topic's Covered:

Wind energy systems, Wind Turbines ,Photovoltaic systems ,Power quality Problems, Dynamic Voltage Restorer, Multi Level inverter , H-Bridge converter, PWM Techniques Simulation using MATLAB.

participant's Response:

The IV B.Tech students of EEE branch has participated and they found this training programme as a platform to develop their inherent skill's . All the participants feel satisfactory about training programme .

PROGRAMME REPORT

PROGRAMME DESCRIPTION:

Micromachining refers to techniques for fabrication of 3D structures on the micrometer scale. Recent demands for micro parts have required us to manufacture variety of micro components used in different fields from entertainment electronics to biomedical implants. The convenience and value of many products can be substantially increased with reduced size and weight.

Micro parts may have overall size of few millimeters but it has many features that falls in micro range from $1\mu\text{m}$ to $500\mu\text{m}$. features size of $100\mu\text{m}$ is common in micromachining. This means small as hair size, the average hair diameter is about $100\mu\text{m}$. The participants were getting more knowledge on various Micro Machining processes and their applications. This program was conducted from 21-11-2016 to 17-04-2017 in Mechanical Engineering Department.

TOPICS COVERED:

ABRASIVE JET MICRO MACHINING, ULTRASONIC MICRO MACHINING, ABRASIVE WATER JET MICRO MACHINING, ABRASIVE FLOW FINISHING, MAGNETIC ABRASIVE FINISHING, LASER BEAM MICROMACHINING, ELECTRON BEAM MICROMACHINING, MICRO TURNING, MICRO DRILLING.

PARTICIPANTS RESPONSE:

In this VET Programme all the Mechanical Engineering students has participated and they found importance of the skill required in industry and enriching. All the participants feel satisfactory about this VET programme.

PROGRAMME REPORT

PROGRAMME DESCRIPTION:

Computational fluid dynamics (CFD) is a branch of fluid mechanics that uses numerical analysis and data structures to analyze and solve problems that involve fluid flows. CFD is applied to a wide range of research and engineering problems in many fields of study and industries, including aerodynamics and aerospace analysis, weather simulation, natural science and environmental engineering, industrial system design and analysis, biological engineering and fluid flows, and engine and combustion analysis. The participants were given practice on different methods and analysis used in CFD. This program was conducted from 20-11-2017 to 26-03-2018 in Mechanical Engineering Department.

TOPICS COVERED:

Finite difference method, Finite volume method, Finite element method, governing equations and boundary conditions, finite difference formulations, Gaussian elimination, Von Neumann stability analysis, nonlinear problems, Burgers equations, vortex methods, Navier-stokes system of equations, Linear fluid flow, steady state and Transient problems.

PARTICIPANTS RESPONSE:

In this VET Programme all the Mechanical Engineering students has participated and they found importance of the skill required in industry and enriching. All the participants feel satisfactory about this VET programme.

PROGRAM REPORT

Programme Description:

Provision for Vocational Educational Training Programme at present is generally oriented towards job opportunities. The purposes of this VET Programme is used as a comprehensive term referring to those aspects of the educational process involving in addition to general education. This programme generally focus on providing students with hands-on instruction and experience directly linked to a career in future. It also provides a clear edge in job searches because the students possess the knowledge and practical experience to enter a specific field. This programme was conducted from 19-11-2018 to 05-04-2019 in EEE department.

Topic's Covered:

Electric Vehicle, Applications of Electric Vehicle, Renewable Energy systems, Wind Power systems, Boost Converter, Induction Motor Drives, Stability concepts, Simulation using MATLAB.

participant's Response:

The IV B.Tech students of EEE branch has participated and they found this training programme as a platform to develop their inherent skill's . All the participants feel satisfactory about training programme .

CIRCULAR

This is to inform that all the Mechanical Engineering IV B.Tech Students are hereby informed that, a Vocational Educational Training Programme on "CRYOGENICS" will be conducted from 19-11-2018 to 06-04-2019 by Mr S.GANAPATHI, Assistant Professor, Mechanical Department. So all the final year Mechanical Engineering students are instructed to attend for the vocational education training programme without fail.

PROGRAMME REPORT

PROGRAMME DESCRIPTION:

Cryogenics is defined as the scientific study of materials and their behavior at extremely low temperatures. Measuring the temperature of cryogenics requires special sensors. Resistance temperature detectors (RTDs) are used to take temperature measurements as low as 30 K. Below 30 K, silicon diodes are often used. There are several applications of cryogenics. It is used to produce cryogenic fuels for rockets, including liquid hydrogen and liquid oxygen (LOX). The strong electromagnetic fields needed for nuclear magnetic resonance (NMR) are usually produced by super cooling electromagnets with cryogenics. The participants were getting more knowledge on various fuels and refrigerants. This program was conducted from 19-11-2018 to 06-04-2019 in Mechanical Engineering Department.

TOPICS COVERED:

Low Temperature properties of Engineering Materials, Applications in space, Food Processing, super conductivity, Electrical Power, Biology, Medicine, Electronics and Cutting Tool Industry. Low temperature properties of engineering materials. Cryogenic fluid storage and transfer systems, Cryogenic instrumentation.

PARTICIPANTS RESPONSE:

In this VET Programme all the Mechanical Engineering students has participated and they found importance of the skill required in industry and enriching. All the participants feel satisfactory about this VET programme.
